PRIYA RAGHAVAN

Backend En

SUMMARY

Backend engineer with 4 years of experience building Python web services and internal tools. Comfortable owning a service end to end, from schema design to production rollout. Looking for a senior role with more architectural ownership.

EXPERIENCE

Backend Engineer - Nexora Logistics (Feb 2023 - Present)

- Built APIs for internal tools used by the operations team
- Migrated a legacy shipment service from Flask to FastAPI
- Wrote background jobs to sync carrier tracking data every night
- Added Redis caching to the rate-quote endpoint, which made it noticeably faster
- Took part in on-call rotation and fixed production incidents
- Reviewed pull requests for two junior engineers

Software Engineer - Brightlane Technologies (Jul 2021 - Jan 2023)

- Developed REST endpoints for a customer billing dashboard
- Wrote PostgreSQL queries and added indexes to slow report pages
- Set up CI with GitHub Actions to run tests on every pull request
- Containerised three services with Docker for local development
- Helped move file storage from the local disk to object storage

SKILLS

Languages: Python, SQL, JavaScript (basic), Bash
Frameworks: FastAPI, Flask, SQLAlchemy, pytest
Data: PostgreSQL, Redis, SQLite
Tools: Docker, Git, GitHub Actions, Linux, Postman
Practices: REST API design, unit testing, code review, Agile/Scrum

EDUCATION

B.E. Computer Science, Visvesvaraya Technological University, 2021

CERTIFICATIONS

Python for Everybody (Coursera, 2021)
